

OLUWADAMILOLA SAMUEL ADEMILUYI

SENIOR FULL-STACK APPLICATION DEVELOPER | .NET | REACT | MICROSOFT AZURE

St. John's, NL, Canada | +1 (709) 351-3316 | dammy2tech@gmail.com

[Portfolio](#) | [LinkedIn](#) | [GitHub](#) | Canadian Permanent Resident

PROFESSIONAL SUMMARY

Senior Full-Stack .NET Developer with 8+ years of experience designing, modernizing, deploying, and supporting secure enterprise web applications across finance, education, healthcare, workforce management, e-commerce, and public-facing verification workflows. Strong hands-on expertise in C#, ASP.NET Core, React, TypeScript, REST APIs, SQL Server/Azure SQL, Clean Architecture, reusable components, Microsoft Azure, and CI/CD. Proven ability to translate business requirements into maintainable technical solutions, troubleshoot production incidents, improve application performance, modernize legacy systems, and collaborate effectively with business, architecture, security, DevSecOps, and delivery teams.

CORE TECHNICAL COMPETENCIES

Full-Stack	C#, ASP.NET Core, .NET, ASP.NET MVC, .NET Framework, React, Vite, TypeScript, JavaScript, Bootstrap, jQuery
APIs & Architecture	REST APIs, Minimal APIs, Clean Architecture, Repository Pattern, Unit of Work, reusable modules, enterprise integrations
Azure & DevOps	Azure App Service, Azure Functions, Azure SQL, Azure DevOps, Entra ID/Azure AD, Key Vault, Application Insights, Storage, Service Bus, API Management, Container Apps, AKS, CI/CD
Infrastructure	Docker, Kubernetes, ARM templates, Bicep, Terraform, GitHub, Git
Security	OAuth 2.0, OpenID Connect, JWT, ASP.NET Identity, authentication, authorization, role-based access control, secure SDLC
Data & Reporting	SQL Server, Azure SQL, PostgreSQL, Entity Framework/EF Core, stored procedures, query optimization, Stimulsoft Reports, Crystal Reports
Delivery	Agile/Scrum, SDLC, production support, root-cause analysis, release management, technical documentation, stakeholder management

PROFESSIONAL EXPERIENCE

Senior Full-Stack .NET Developer

Jan 2026 - Present

Saffromex Limited

Remote

- Lead the design, development, enhancement, and support of secure enterprise applications using ASP.NET Core, C#, EF Core, SQL Server, React, TypeScript, JavaScript, Bootstrap, and REST APIs.
- Translate business and operational requirements into scalable workflows, reusable application components, technical specifications, and maintainable full-stack solutions.
- Develop secure APIs, backend services, data-access layers, authentication, and role-based authorization using modern .NET patterns and separation of concerns.
- Deploy and support cloud-ready applications using Microsoft Azure services, CI/CD pipelines, environment configuration, application monitoring, and secure secret management.
- Troubleshoot production and non-production defects, analyze application and database behaviour, perform root-cause analysis, and implement corrective actions to improve reliability.
- Design and optimize SQL Server databases, stored procedures, views, indexes, reporting datasets, and complex business queries.
- Coordinate releases, user onboarding, technical training, documentation, stakeholder communication, and continuous improvement activities.

Senior Software Programmer

Jan 2021 - Dec 2025

Olabisi Onabanjo University

Ago-Iwoye, Nigeria

- Designed, developed, and supported enterprise systems that automated academic, payroll, budgeting, procurement, revenue, accounting, and reporting operations.
- Built and maintained ASP.NET/C# applications, REST-connected components, SQL Server databases, business workflows, role-based permissions, audit features, and operational reports.
- Developed a postgraduate result-processing platform that automated result computation, transcript preparation, academic reporting, and approval workflows.
- Developed SASBURSARY, an integrated financial management platform supporting payroll, budgeting, procurement, revenue, expenditure control, and financial reporting.
- Optimized application workflows and SQL queries, reducing response times by approximately 50% across critical modules.
- Mentored junior developers and collaborated with academic, administrative, finance, and ICT stakeholders throughout the SDLC.

- Improved reliability through code reviews, coding standards, structured testing, defect prevention, technical documentation, and support procedures.

Coniah Systems Support Limited

Dec 2018 - Dec 2020

Software Engineer

Lagos, Nigeria

- Developed and supported enterprise applications for healthcare and financial environments using .NET Framework, .NET Core, ASP.NET, C#, VB.NET, SQL Server, JavaScript, and JSON.
- Built Web APIs, backend services, database solutions, and reporting components with emphasis on security, maintainability, performance, and operational continuity.
- Gathered requirements and converted business processes into technical designs, database structures, application workflows, and production-ready features.
- Supported deployments, incident troubleshooting, defect resolution, production maintenance, upgrades, and incremental modernization of legacy applications.
- Implemented operational and financial reporting using Crystal Reports, Stimulsoft Reports, and SQL Server datasets.

SELECTED ENTERPRISE PROJECTS

CertiTrust - Academic Certificate Verification Platform

Designed a secure public-facing credential platform enabling institutions to issue, manage, revoke, and track certificates while external users verify authenticity through a controlled workflow. Implemented React 19 and TypeScript front end, .NET 10 APIs, SQL Server, JWT authentication, ASP.NET Identity, role-based access control, verification history, and dashboard analytics.

GitHub Link: <https://github.com/DammySmartSolutions/CertificateVerificationSystem.git>

Automated Task Scheduling System

Built a configurable workforce scheduling platform that assigns employees to operational tasks while enforcing availability, workload balancing, staffing levels, role restrictions, and fairness rules. Applied ASP.NET Core MVC, C#, EF Core, SQL Server, Identity, Repository Pattern, Unit of Work, reporting, and automated validation.

GitHub Link: https://github.com/DammySmartSolutions/AutomatedTaskSchedulingSystem_.NetCore.git

SASBURSARY - Financial Management Information System

Developed and supported a university-wide platform covering payroll, budgeting, procurement, accounting, revenue, expenditure control, and financial reporting. Modernized and optimized business-critical ASP.NET Web Forms, C#, EF, SQL Server, Bootstrap, and reporting workflows.

GitHub Link: <https://github.com/DammySmartSolutions/SASBURSARY.git>

AI-Powered Customer Support Assistant

Developed a responsive React/Vite client and FastAPI backend for a retrieval-augmented support assistant. Integrated REST APIs, cloud deployment, contextual retrieval, and separate frontend/backend delivery pipelines.

EDUCATION

Master of Applied Science (MAsc.) in Software Engineering Memorial University of Newfoundland CGPA: 4.0/4.0	2024 - 2025
Master of Science (M.Sc.) in Computer Science University of Benin CGPA: 4.5/5.0	2016 - 2018
Bachelor of Science (B.Sc.) in Computer Science Olabisi Onabanjo University CGPA: 4.28/5.0	2011 - 2015

CERTIFICATIONS & RECOGNITION

- IBM Full Stack Software Developer - IBM Skills Network / Coursera, 2026
- Google Project Management Professional Certificate - Google / Coursera, 2026
- Machine Learning with Python - IBM / Coursera, 2023
- Fellow of the School of Graduate Studies - Memorial University of Newfoundland, 2026 (academic excellence distinction)
